

Tectonic Plates Movement Trigger Earthquakes Is A Myth . It Is The Sun (Other Celestial Bodies Also) That Triggers Earthquakes By Second Order Of Universe (Quantum Entanglement) . Hence It Is Not Permanent Defect In Earth . Earthquakes Could Be Predicted (That Causes Major Losses) And Prevented (By Atomic Genetics Engineering)

Dr V M Das

Das Nursing Home , Fatehgarh , India University Of God

ABSTRACT

The basic idea is that as the Earth's spin slows slightly, the equator shrinks. However, tectonic plates don't shrink as easily, meaning the edges of the plates get squeezed. Although this amount of squeezing isn't huge, it does put added stress on plate boundaries that are already under stress, where earthquakes are more likely, Bilham said. [1] .Thought of triggering of spin of Earth has no relationship with thought of trigger of Earthquakes . Both thoughts are separate and their simultaneous expressions are independent of each other (Mendel's Law of independent assortment) . To understand spin of Earth and Earthquakes we have to understand Basic Building Blocks of Universe – mind and mass (Fig -1) . Thought of spin of Earth is triggered by Earth (Higher center) while thought of triggering of Earthquakes is triggered by celestial bodies of Solar system mainly Sun (Higher center) . These are fed thoughts and feeding was done in precreation era by Highest Center of Universe . Hence earthquakes could be predicted (By Science of Astrology – movement of celestial bodies mainly sun) and prevented (only by atomic genetics engineering - Quantum Entanglement) . Planets do spin by virtue of thought of spin is triggered . Direction and magnitude of spin is also decided by different thoughts . It is constant in Time unless thought gets changed . The energy is supplied by energized gravitons (energy pool of universe) . Same philosophy is followed by spin of satellites , asteroids and galaxies .

I. INTRODUCTION

Tiny Slowdown in Earth's Rotation Could Unleash Major Earthquakes

By Tia Ghose, Senior Writer | November 20, 2017 06:36pm ET [1]

Credit: agsandrew/Shutterstock

A tiny slowdown in Earth's rotation next year could trigger more earthquakes than usual, new research suggests. Past periods of slow rotation over the last 100 years have coincided with more earthquakes than average, according to research presented last month at the annual meeting of the Geological Society of America. "The numbers of earthquakes that have occurred each year in the past century are well known. **The changes**

in Earth's rotation rate are also well known," study co-author Roger Bilham, a geophysicist at the University of Colorado Boulder, said in an email to Live Science. "All we have done is to compare these two well-known lists of numbers and report an interesting and useful relationship." [Image Gallery: This Millennium's Destructive Earthquakes]

The basic idea is that as the Earth's spin slows slightly, the equator shrinks. However, tectonic plates don't shrink as easily, meaning the edges of the plates get squeezed. Although this amount of squeezing isn't huge, it does put added stress on plate boundaries that are already under stress, where earthquakes are more likely, Bilham said.

Historical pattern

Bilham and his colleague, Rebecca Bendick, a geophysicist at the University of Montana in Missoula, looked at the history of earthquakes of magnitude 7 or greater since 1900.

On average, there were about 15 major earthquakes per year since 1900. However, during certain periods, the planet sees between 25 and 35 earthquakes greater than magnitude 7 in a year. When the team looked more closely, they found those periods coincided with times when the Earth spins more slowly, meaning the days get slightly longer. Changes in Earth's rotational speed can be caused by weather patterns like El Niño, ocean currents and currents in the molten core of the planet. When fluids speed up, the solid Earth must slow down, Bilham said. Because NASA tracks the length of the day to the microsecond, these slowdowns in Earth's spin can be predicted five years in advance, Bilham said. Based on that data, the Earth is entering a period of prolonged slower rotation. As a result, next year could see more quakes, if past data is any indication. Whereas an average year might see about 15 earthquakes of magnitude 7 or greater, the next four years could see closer to 20 earthquakes of that size, Bilham said. "Knowing that earthquakes will be more plentiful in five or six or seven years is useful because if a city planning department is considering retrofitting buildings to make them earthquake-safe now, or in 10 years' time, the knowledge that more earthquakes are on their way may make them act now, rather than later," Bilham said. However, this effect will likely impact only faults that are already under stress and at high risk of rupture. "We have no information on where these earthquakes will occur, except that they will occur at the world's plate boundaries," Bilham said.

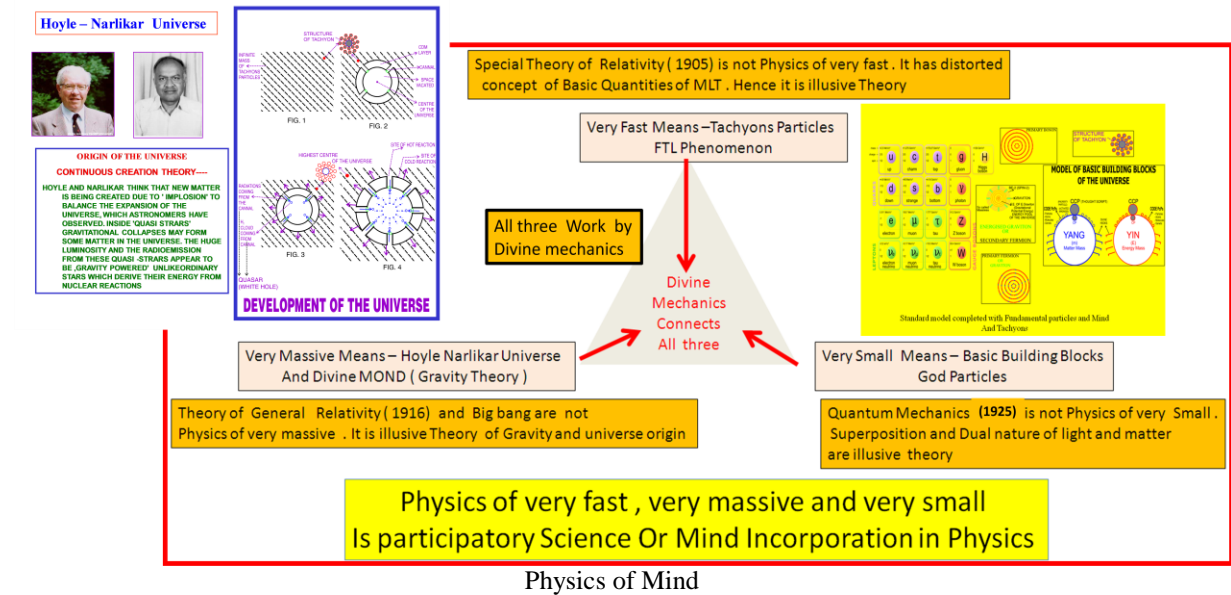

Possible effect

"It's a very interesting possible effect," said Amos Nur, a geophysicist at Stanford University in California, who was not involved in the research. "Even though the rotation rate changes so little, the size of the mass [of the Earth] and the inertia are so great, you don't need a huge change in rotation to have a change in stress." Scientists still have only a poor understanding of what triggers earthquakes, and have no way to predict earthquakes, so it would be impossible to definitively pin any given earthquake on Earth's rotation, Nur said. Still, there are ways to validate the researchers' basic idea, Nur said. "The next step would be to go back and try to model what happens to the stress inside the Earth," when its rotation changes, Nur told Live Science. "It's not ridiculous. It's quite feasible."

What is New Physics or Physics of Mind ?

Quantum Consciousness – According to Physicists and Biologist

The nature of consciousness remains deeply mysterious and profoundly important, with existential, medical and spiritual implication. We know what it is like to *be* conscious – to have awareness, a conscious ‘mind’, but who, or what, are ‘we’ who know such things? How is the subjective nature of phenomenal experience – our ‘inner life’ - to be explained in scientific terms? What consciousness actually *is*, and how it comes about remain unknown. The general assumption in modern science and philosophy - the ‘standard model’ - is that consciousness emerges from complex computation among brain neurons, computation whose currency is seen as neuronal firings (‘spikes’) and synaptic transmissions, equated with binary ‘bits’ in digital computing. Consciousness is presumed to ‘emerge’ from complex neuronal computation, and to have arisen during biological evolution as an adaptation of living systems, extrinsic to the makeup of the universe. On the other hand, spiritual and contemplative traditions, and some scientists and philosophers consider consciousness to be intrinsic, ‘woven into the fabric of the universe’. In these views, conscious precursors and Platonic forms preceded biology, existing all along in the fine scale structure of reality.

Wrong depiction of visual realization

My research involves a theory of consciousness which can bridge these two approaches, a theory developed over the past 20 years with eminent British physicist Sir Roger Penrose. Called ‘orchestrated objective reduction’ (‘Orch OR’), it suggests consciousness arises from quantum vibrations in protein polymers called microtubules inside the brain’s neurons, vibrations which interfere, ‘collapse’ and resonate across scale, control neuronal firings, generate consciousness, and connect ultimately to ‘deeper order’ ripples in spacetime geometry. Consciousness is more like music than computation.

Colleagues Travis Craddock and Jack Tuszynski and I also study how anesthetics act in microtubules to erase consciousness, and with Jay Sanguinetti, John JB Allen and Sterling Cooley, we are studying how transcranial ultrasound (TUS) can be used noninvasively to resonate brain microtubules and treat mental, cognitive and neurological disorders. Many thanks to my assistant Abi Behar-Montefiore and Ed Xia for maintaining this website.

1.2 Mind and Mass Realities [2]

This is called Final Truth . Mind and Mass mysteries have emerged like OMNIPRESENT .e. Every small and bigger units are made up of these B.B.Bs

I am The origin of all every thing evolved from Me.—Gita 10/8

These are divine in the sense that they talk with each other: They have power to transmutate to form any bigger unit of the universe. The triggering activity is atomic transcription and translation.

MODEL OF BASIC BUILDING BLOCKS OF THE UNIVERSE

Mind & Mass : Part of Truth

Fig. 1 Divine Mechanics Unit – CCP, CP and information s – Code PcPs with B-Bit – Mass

Atomic genetics is the branch of science where we investigate about fundamental interactions of the universe i.e. atomic transcription and translations . New words have been coined to understand hidden science of mind part of reality. Mind reality has been recognized as different faces by “I” about 5000 years back to Arjuna in Mahabharata.as shown in Fig 1. It is just like to understand any language through Alphabets. These are (different faces) Alphabets of mind reality. One Mind reality has one face identity and the second mind reality has second face identity and so on. The facial expression represents phenomenon of intelligence and different faces represent different types of properties carrying property. The open eyes means property is activated while close eye means property is inactivated. In spite of carrying properties consciousness they also know how to conduct not only origin of universe but also how to create two different universe i.e. next creation could be different from this creation . In all, it is automatic system of the universe . The mind realities which are of good properties have devtas face identity (first five faces on both side) and those mind realities which are of bad properties have demons face identity (last four faces on both side) . These are named as code PCPs or messenger atomic genes . The central face is CCP or Thought script where all thoughts of the universe are banked . It is bank of data of all information s of the universe It is face identity of Anti mind particles as data of all information’s of the universe are stored as anti mind particles . It is the Time mind ness (biological clock) that keeps on expressing different thoughts from this thought script (CCP) . There are four more faces (black bodies) shown on extreme left and right floating in fire are CPs (translating Atomic genes) . That translates the messages and realizes it and reacts accordingly.[2]

1.3. Messages From Biological world to understand B.B.B world as shown in Fig 2 [2]

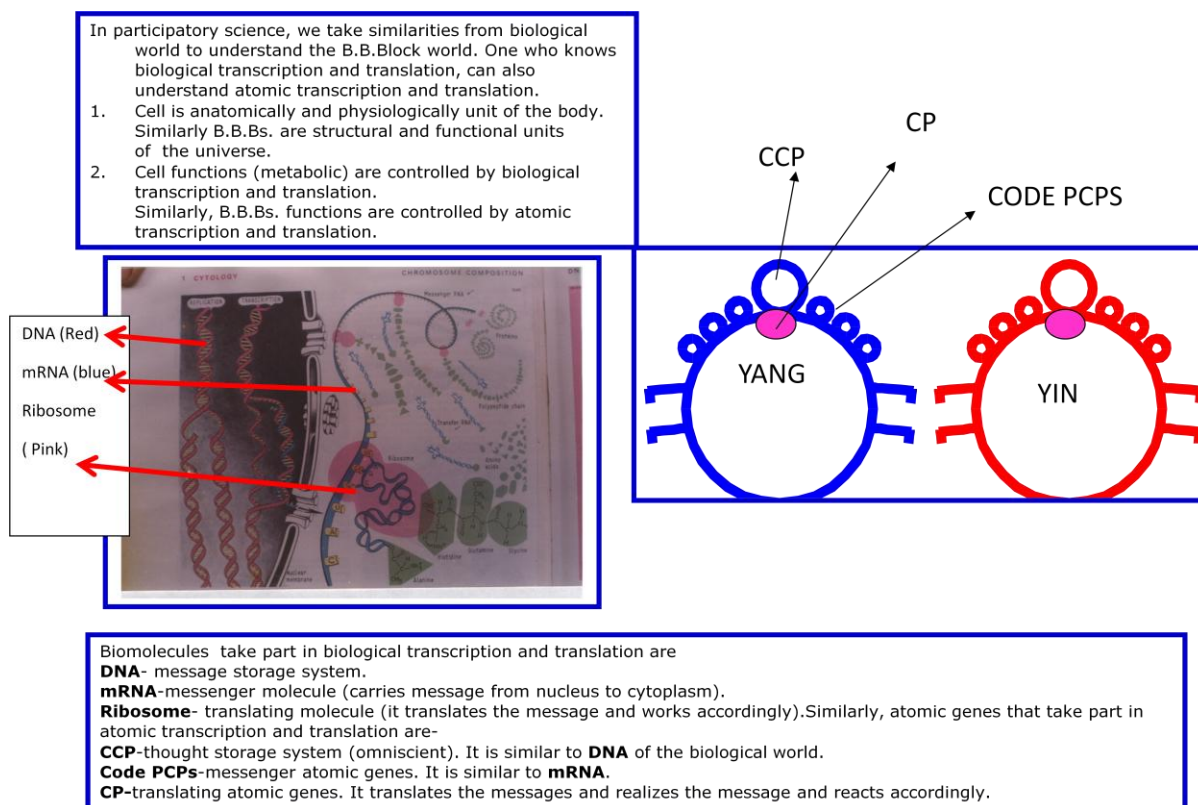

Fig. 2 Parallel teaching by participatory science

The standard model not only modified rather it has been completed [3] with introduction of energized gravitons , primary fermions, primary bosons , Basic Building Blocks , Mind and Tachyons as shown in Fig 3

Standard model completed with Fundamental particles and Mind And Tachyons

Fig. 3 standard Model chart [3]

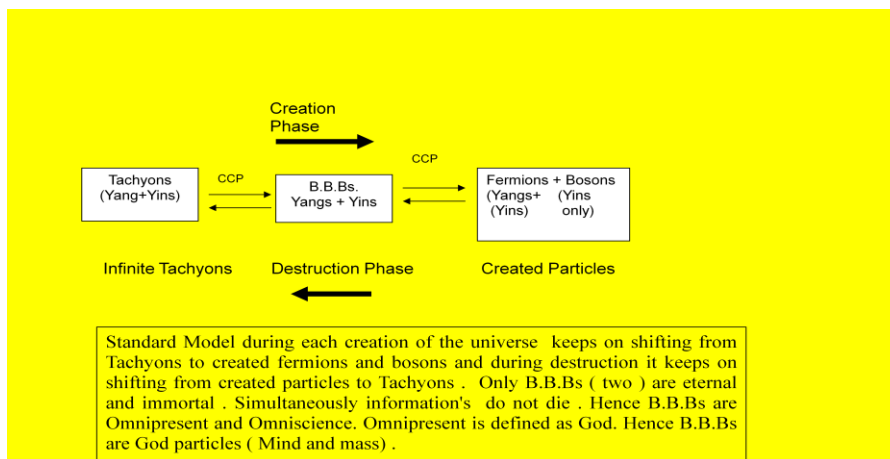

Fig.3.1 one creation and destruction cycle [4]

Participatory science has coined [5] some new words and there are some words which already exist in physics. Both these words are defined here and the definitions are according to participatory science. It has no relation with the definitions given in modern physics.

1. Mass - The part which gives shape to the smallest mass unit i.e. basics building blocks (B. B. Bs.) is called mass.

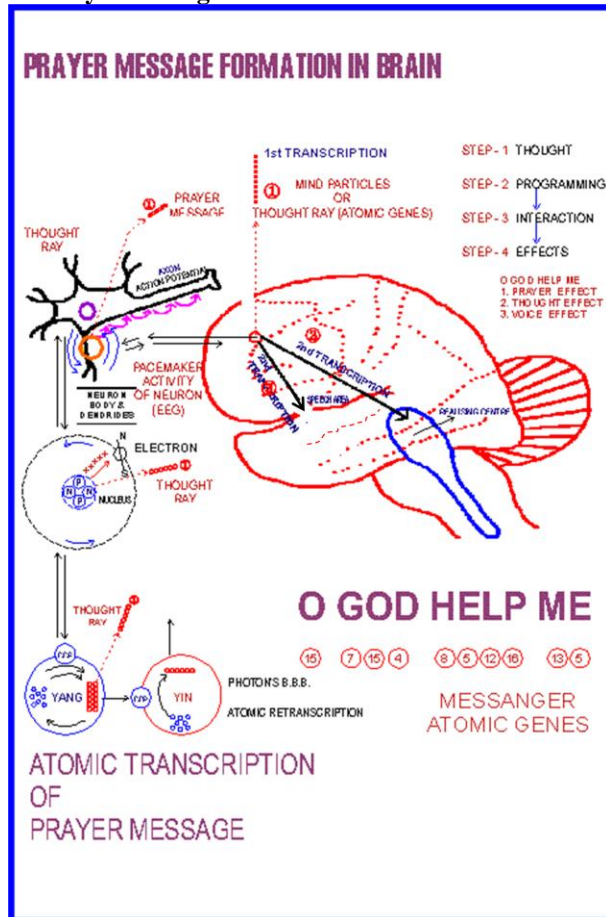

2. Matter :- Mixture of fermions and bosons or only bosons which are made up of mass (B.B.Bs) and that is why we realize their shape is called matter.

3. Inertial mass :- Mass (smallest mass units i.e. B. B. Bs) having inertial properties (classical inertia) either absolute rest or uniform motion in straight line is called inertial mass. Or Number of B. B. Bs. Per unit space present in bigger units is called inertial mass. Or Total matter contained by the bigger units or total number of fermions and bosons contained by the bigger units is called inertial mass. Therefore it never changes from place to place.

4. Gravitational mass :- The mass (interacting surfaces) which takes part in gravity (divine energized gravitons theory) interaction (which is due to mind) is called gravitational mass. When gravity interaction increases (number of divine energized gravitons increases) the interacting mass (interacting surface) also increases or when interacting mass (interacting surfaces) increases, gravity interaction (number of divine energized gravitons) also increases. Therefore gravitational mass (interacting mass or surfaces) changes from place to place. It is the fed mind that decides gravity interaction. We shall discuss it in gravity chapter and in atomic genetics.

5. Pure m (matter) mass :-matter mass (smallest mass unit or B.B.B) which have got inertial property of absolute rest.
6. Energy mass:-Energy mass (smallest energy mass unit B.B.B) which have got inertial property of uniform motion in straight line and which also gives shape to the bigger energy mass (Higgs Bosons etc) units.
- 7.m (impure matter) of $E=mc^2$:-Matter particles (fermions) which have got spin property are called impure matter particles.

1.4 Prayer message formation in brain.

ATOMIC GENETICS

Fig 4 Divine Mechanics - Prayer message formation in brain

In atomic transcription and translation of prayer [5], following steps take place on Yang B.B.B – B-Bit as shown in Figure 4.

- 1.CP removes RM (repressor mindness-green) from OM (operating mindness -orange) thus induction of atomic transcription triggers.
- 2.OM triggers activation of free mind particles (black -inactivated code PCPs) of that thought script (magenta) of “o god help me ”.
- 3.Free mind particles (black -inactivated code PCPs) get attached to anti mind particles script (magenta one) to form messenger thought script of “o god help me ”.
- 4.Messenger atomic genes (black) get activated by anti mind particles thought script and further they get detached from anti mind particles thought script to form activated messenger atomic genes (activated code PCPs) (magenta) of “ o god help me ”
- 5.CP carries phenomenon of splicing by translating the messenger activated atomic genes (activated code PcPs) and finally there is activated message of “ o god help me” is formed .
- 6.CP represses atomic transcription by adding RM (green) to OM (orange) . Thus atomic transcription gets halt.

Having formed the message it comes out in three forms .

In atomic genetic engineering (prayer) we use our basic power i.e. power of B.B.Bs. Our B.B.B. (higher center) talks with highest center of the universe by sending the message by first transcription. Till today nobody

knows how does the brain generate thoughts. I am going to tell you that mystery too. In the frontal lobe the neurons are responsible for thought generation. In the neuron there is electrical activity called pacemaker activity which is occurring between dendrites and the body of the neuron. The membrane of the cell is made up of atoms and atom is made up of B.B.Bs. At the level of B.B.B. say thought of 'O GOD HELP ME' is expressed. As a result programmed messages of O GOD HELP ME (code PCPs) are formed. Out of three programmed messages, one is carried by atomic genes to highest center of the universe. It is called **THOUGHT RAY (Quantum entanglement)** which is made up of pure atomic genes and then the message goes through phenomenon called first transcription. They come out from brain directly. The other two messages are carried by photons from nucleus of atom to electrons. Here they are modulated on electrical activity of the cell called pacemaker activity. Further they are modulated on actions potentials going towards **REALIZING CENTER** situated in brain stem (RAS) and from RAS to speech area situated in the frontal area. Target B.B.Bs. of the realizing center finally realizes thought effect of O GOD HELP ME. While from speech area message goes to motor cortex again via RAS and from there to vocal cords and finally it comes out as a speech effect of O GOD HELP ME. In layman's terminology formation of the thought ray means PRAYER as shown in Fig 4

Where Does Prayer Message go ?

Prayer message goes as shown in Figure 5 to highest center of the universe via first transcription where it is realized and it is accepted, the highest center sends two messages to B.B.Bs working as higher center in cancer cell. These messages are message of inhibition of abnormal thought expression and message of activation of normal thought expression. Having received the messages, higher center stops expressing the abnormal thoughts and it starts expressing the normal thoughts. As a result, there are no more abnormal programmed messages and in place of that normal programmed messages are there. Now the messages have shifted from abnormal (5 and 6) to normal (2 and 3). This shifting of thought expression is called **ATOMIC GENETIC ENGINEERING** as shown in **Figure 4.1**

The changed messages reach to target B.B.Bs. through same route. Having received the changed messages, target B.B.Bs. stop expressing the previous programming and they start expressing the normal programming. As a result the cancer cells transmutate into normal cells. **Or diseased cell gets cured [6]** as shown in **Fig 4.1**

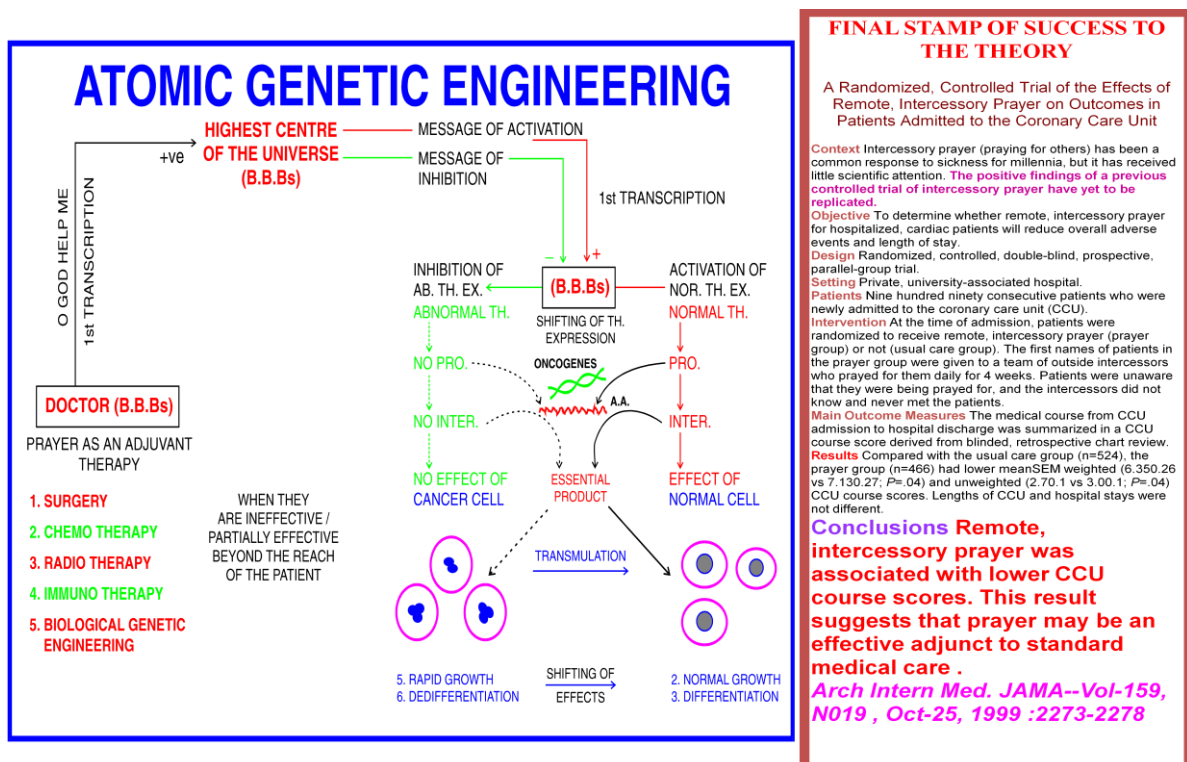

Fig. 4.1 A.G.E and Final stamp of success to New Theory[6]

1.5 Message system of the Universe

Before the origin of the universe [2] nature had only one type of message systems which is called FIRST TRANSCRIPTION. Messages (Code PcPs) used to go from one B.B.B. to another B.B.B. by atomic

transcription. Messages were carried by atomic genes (Code PcPs) with very very high velocity. It is the fundamental message system.

After the origin of the universe, nature created atoms. It also created one more message system called SECOND TRANSCRIPTION. Here the message (code PcPs) are carried by photons from one atom to another atom with velocity of light. Thus atoms ,molecules, cells, and even individuals talk with one another

After the formation of the cell , nature created one more system called THIRD TRANSCRIPTION .Here there is a message storage system formed by DNA. There are messenger molecules called mRNA that carry message from DNA script to cytoplasm where the message (code PCPs) is read or translated by ribosome and they work accordingly. Thus the messages reach to enzymes and hormones and finally messages reach to target units. Having received the messages, target units work accordingly. Finally life effects (metabolic) are observed. These three types of message systems are working in the nature. These message system are being used by the nature according to nature's need. as shown in Fig 5

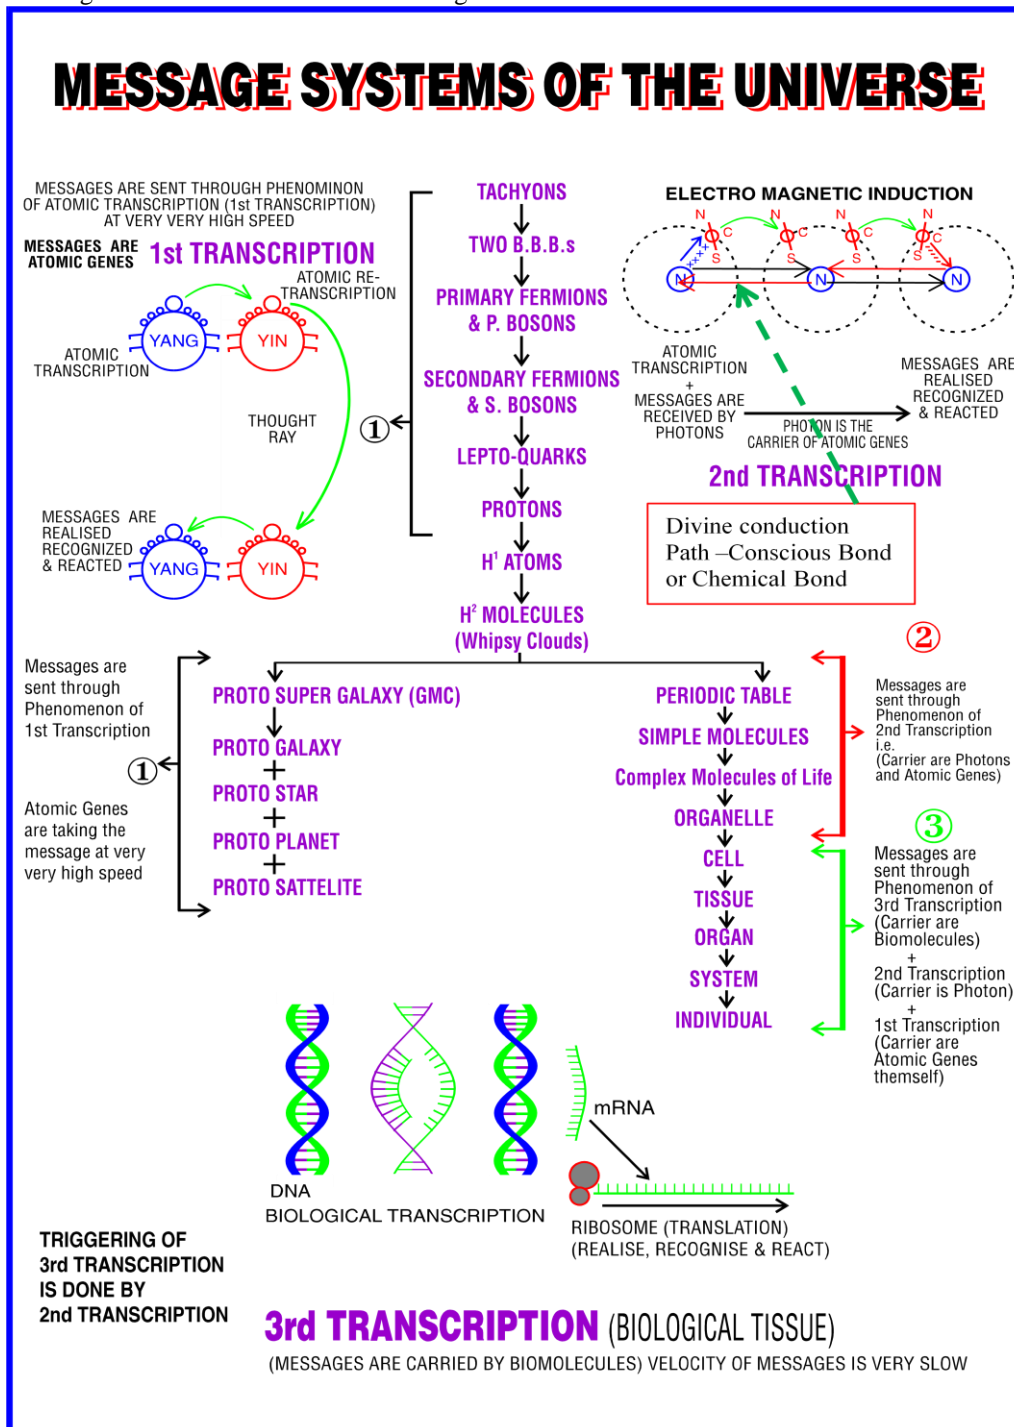

Fig. 5 Messages system of the universe

1.6 How does nature work & triggering of normal & abnormal effects

To understand creation physics as shown in Fig 6 and Fig 7. . There are two types of thought stimulation [2] . One is **CONDITIONED THOUGHT STIMULATION** and other one is **UNCONDITIONED THOUGHT STIMULATION**.

STIMULATION OF THOUGHT EXPRESSION --- There are two types of thought expressions one is **CONDITIONED STIMULATION** of thought expression, and other one is self stimulation of thoughts i.e. **UNCONDITIONED STIMULATION** of thought expression .

At the time of the origin of the universe, all effects got created. The cause of all effects of the universe is **THOUGHT** expression. These thought expressions were triggered by **UNCONDITIONED OR SELF STIMULATED WAY** . It is the first step and it is followed by **PROGRAMMING** or formation of programmed messages by code **PCPs**. This programmed message moves from higher centers to target **B.B.Bs**. it is called **INTERACTION**. Having received the messages, the mind and mass of the target **B.B.Bs**. work in a synchronized way so as to produce the effects as thought by a the higher center. If the thought expression by higher center is normal, the shapes, properties and laws produced by target **B.B.Bs**. would be normal and if the thought expressions are abnormal, the shapes, properties and laws would be abnormal. This is the basic concept of **transmutation** phenomenon. Finally what we observe is called **EFFECT**. Appearance of new shapes. properties and laws is called **TRANSMUTATION**. The first three steps are collectively called **CCP**. During transmutation process if **CCP** is written, it does mean that unless the thought, programming and interaction take place, nature cannot transmute. Transmutation phenomenon is seen in particles, atoms, molecules and even in cells. The basic steps of any transmutation remain the same except that the thought expressions differ.

The subatomic particle are made up of more fundamental particles called Basic Building Blocks (B.B.Bs) which are made up of mind and mass. These B.B.Bs are divine in nature with the result they talk with each other by phenomenon called atomic transcription and translation (thought expressions). The triggering of broken symmetry is caused by atomic transcriptions. Unless the atomic transcriptions occur, subatomic particles could never exhibit phenomenon of broken symmetry . So the broken symmetry is never spontaneous. It is being mis understood that sub atomic particles do have spontaneous activities as far as broken symmetry is concerned. Hence the Nobel prize physics 2008 awarded to this work is too early to give prize.

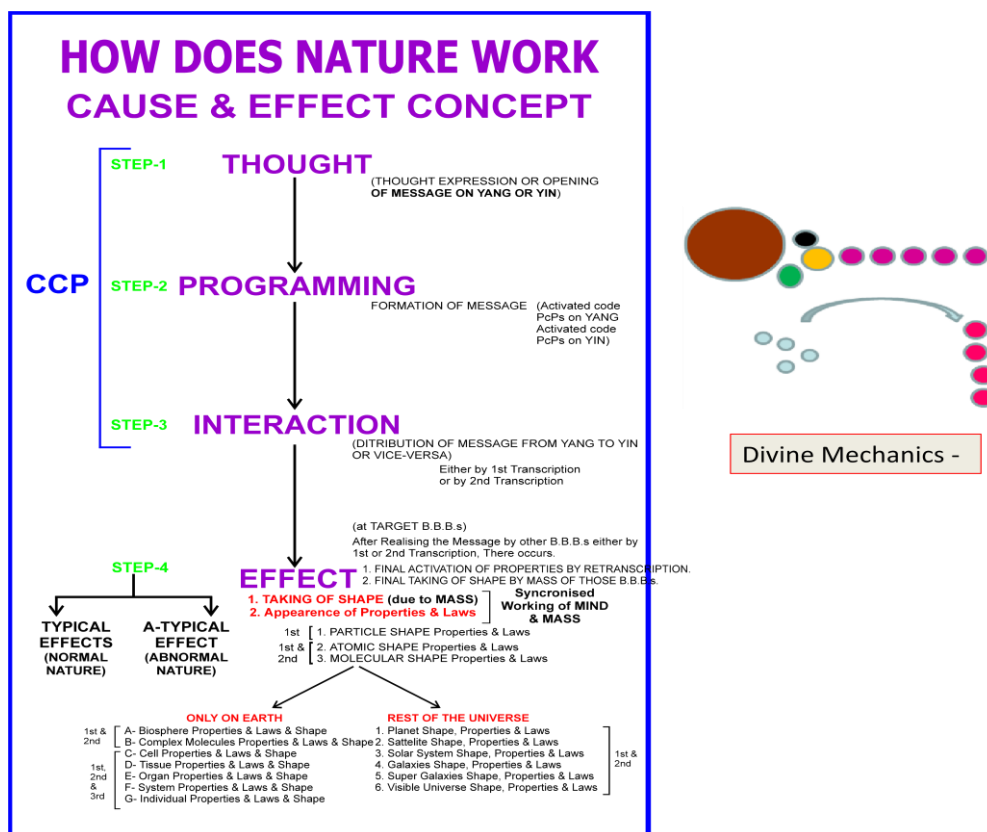

Fig. 6 Divine Mechanics – How Does Nature work ?

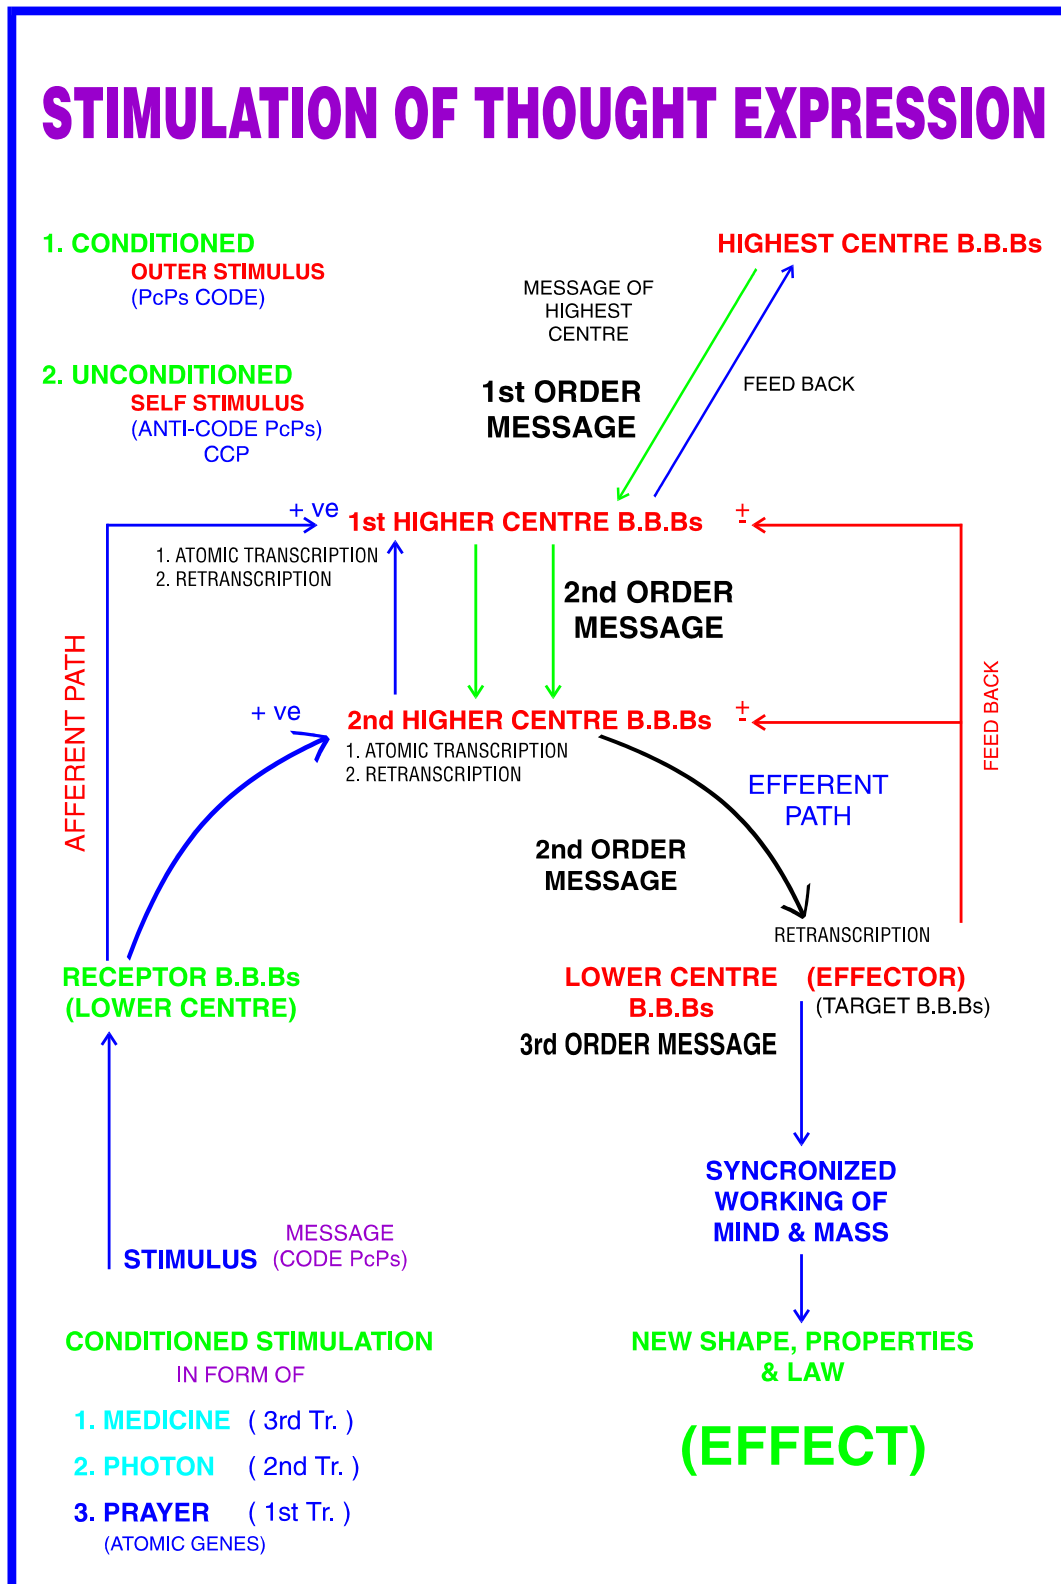

Fig. 7 Conditioned and Unconditioned thought expressions

1.7 Message network of the Universe (Feed Back Mechanism and different centers of the Universe)

With the origin of universe, nature first created primary units i.e. primary fermions (gravitation) and primary boson, these primary units are equipped with one higher center (one B.B.B.) and rest of the B.B.Bs. are working as lower centers or target B.B.Bs.[2] After primary units ,nature created secondary units i.e. secondary fermions and secondary bosons. similarly nature created tertiary units (lepto-quarks) and then quaternary units (protons&

neutrons).

Each unit is equipped with higher centers, lower centers and target B.B.Bs. After quaternary units nature created atomic units, molecular units, complex molecules of life units, organelle units, cell units, tissue units, organ units, system units and individual units. Each unit is equipped with higher centers, lower centers, and target B.B.Bs. Similarly nature created satellite units, planet units, solar system units, galaxy units, super galaxy units, dark matter layer unit. These units are also equipped with higher centers, lower centers and target B.B.Bs. Thus our universe is divided into different units and each unit is equipped with higher and lower centers. All higher centers are under control of highest center of the universe by efferent paths. This efferent path is made up of first transcription. Higher centers can send messages to highest center of the universe by afferent path or feed back path. Thus highest center of the universe is well informed about all effects of the universe. Messages can come from lower centers to higher centers and from higher centers to highest center of the universe via afferent path. The highest center of the universe can send messages to higher centers and from higher center to lower centers. There is an inter unit message network also which is made up of first, second and third transcription depending upon the nature's need. Thus the entire universe is under control of highest center of the universe. Highest center can change any programming programmed by it during pre creation era as shown in Fig 8

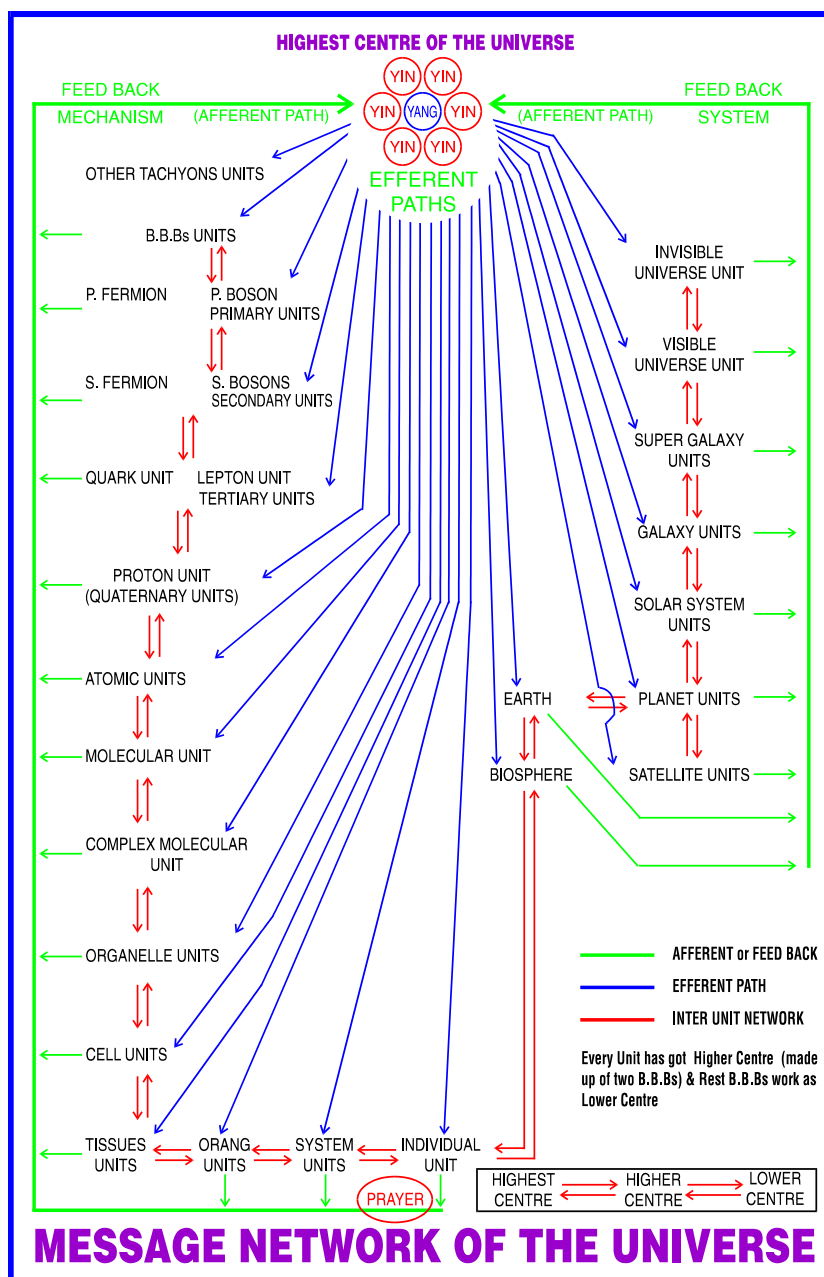

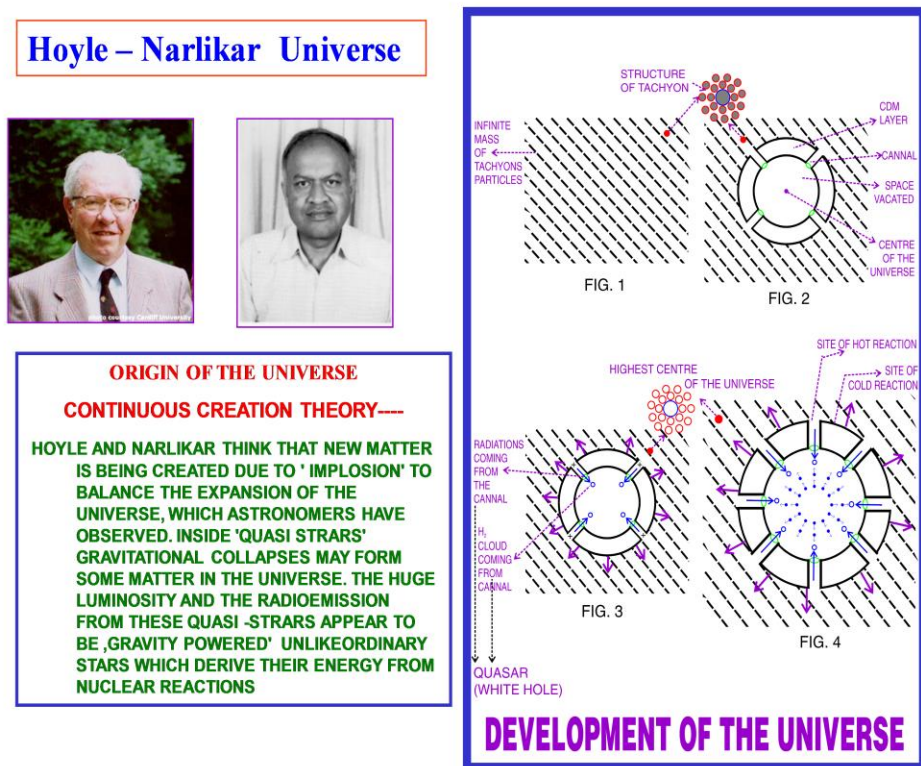

Fig. 8 Messages Net work of the Universe

1.8 Origin of the universe [7]

UNIVERSE "I"

Fig. 9 Development of the Universe

Before the origin of the universe, these Basic Building Blocks (B.B.Bs) as shown in Fig-3 were in the form of tachyons as shown in Fig-9 [7]. It means that at that time the tachyons were everywhere in the universe. Let us look at the structure of tachyons; it is made up of one matter B.B.B. (YANG) and many energy (YINs) B.B.Bs. Initially out of the infinite tachyons, one became the **highest center** of the universe. Messages used to go from highest center to rest of the universe and messages could come from rest of the universe to highest center of the universe by atomic transcription. Thus highest center had fed its thought to rest of the B.B.Bs. that would take part in creation - that they would express only those thoughts to give desired effect as wished by the highest center of the universe. So all B.B.Bs were informed about their role before creation of the universe. In pre-creation era programming of the future universe was done by highest center of the universe. Our universe is oscillating and it is a divine universe. It means that it has a creation phase and a destruction phase. During creation phase tachyons break into their B.B.Bs. and from these B.B.Bs, formation of fermions and bosons take place as shown in Fig 3.1. After the creation phase, destruction would start and in this phase all created particles would again break into their B.B.Bs and finally tachyons would form. At the time of origin of the universe, all the effects got created. These effects are taking of different shapes and appearance of properties and laws. All these effects are studied in various branches of science.

With the origin of the universe, nature first created a sphere of **COLD DARK MATTER (C.D.M)** and canals in it. With the result space got created. At the other end of the canals, hot reaction started (**the relics are background radiations 2.7 degree K of our hydrogen clouds**). As a result hydrogen clouds and lot of radiations were created. The empty canals were filled by these hydrogen clouds and radiations and thus **QUASARS** appeared in the universe. Simultaneously C.D.M. layer started expanding and clouds and radiations kept on coming in this closed universe as shown in Fig 9 . With the passage of time more and more C.D.M. layer formed, more and more quasars formed. The hydrogen cloud came in this closed universe. They started running

towards C.D.M. layer as they were attracted by the gravity of C.D.M. layer. Those clouds, which were nearer, moved faster than those, which were away from CDM Layer. The **HUBBLE LAW**, can thus be explained. With some more passage of time, clouds were joined to form **GMC** (giant molecular clouds). Later by self-gravitation different proto stars, proto planets, proto satellites were formed. Finally stars became bright and thus bright galaxies appeared in this universe. Our universe is still in expansion phase and creation is still going inside quasars. It is to be remembered that highest center of the universe does not come in the visible universe. It keeps on receiving the messages by atomic transcription and it has power to change any programming programmed by it during pre-creation era.

It is the atomic genes which constitutes mind part of reality. Mind incorporation in physics is awaited as theory of every thing is not yet investigated . I have investigated theory of every thing (ToE) and I found that while studying unified theory at the time of origin of the universe by Hoyle Narlikar universe , it was mind reality that triggered symmetry breaking phase . It is mind reality that triggers oscillation phenomenon of the universe. It is the mind reality which is behind perfect cosmological principle . There is nothing like artificial intelligence in the universe . These mind particles constitute intelligence of the universe that controls the deterministic order of the universe. It is the mind reality behind all effects of the universe. But this is not our mind rather it is mind of Almighty B.B.B (Yang B.B.B or matter B.B.B. or Male B.B.B working as Highest center of the universe) . His mind could be manipulated by prayer only . as shown in figure 9.1 and 9.2

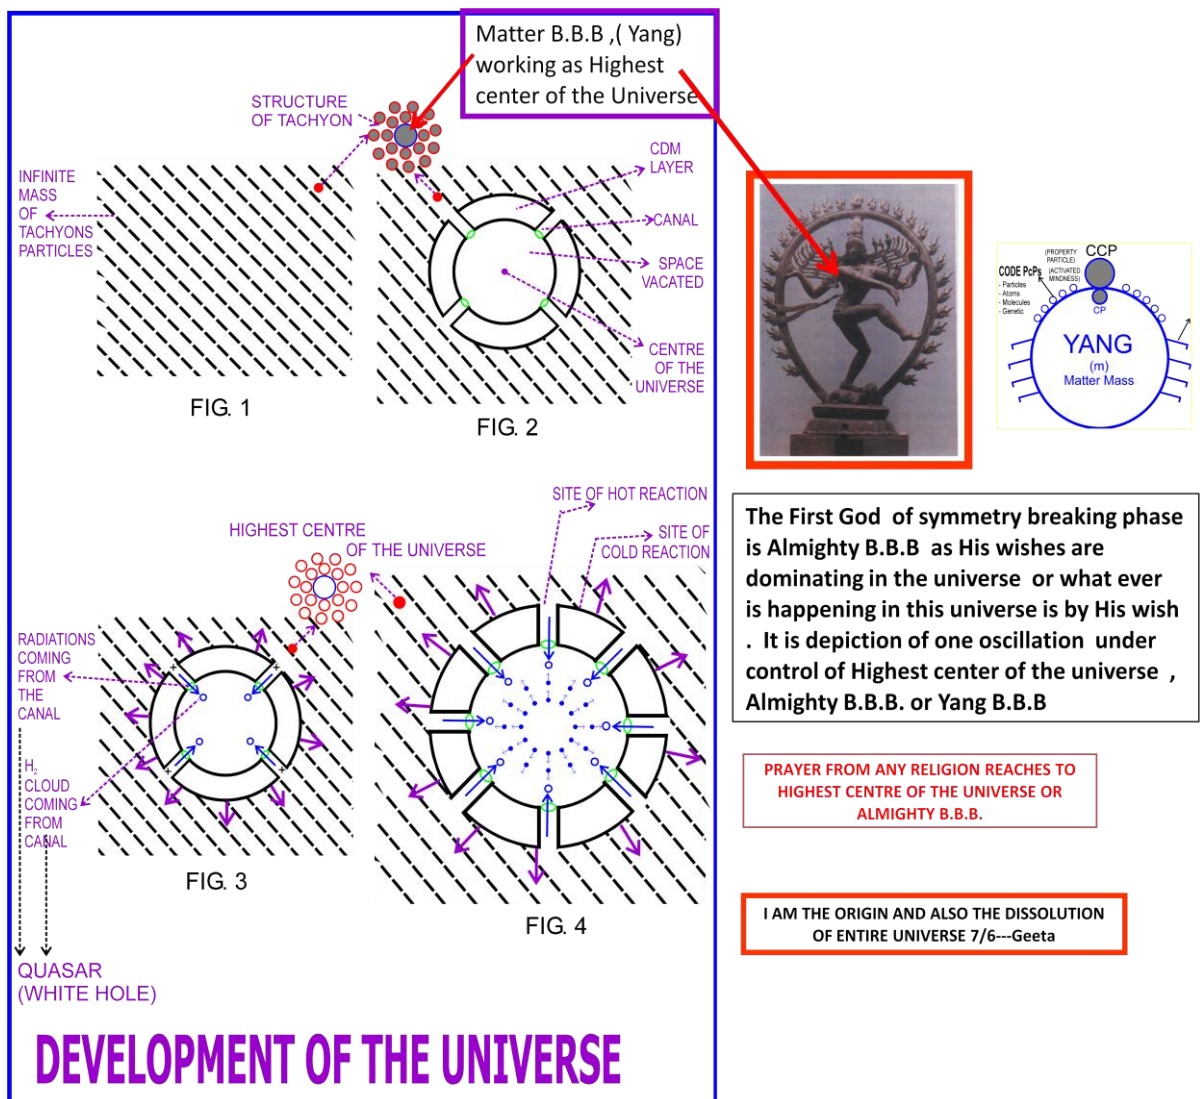

Figure 9.1 Hoyle Narlikar Universe OR Universe “I”

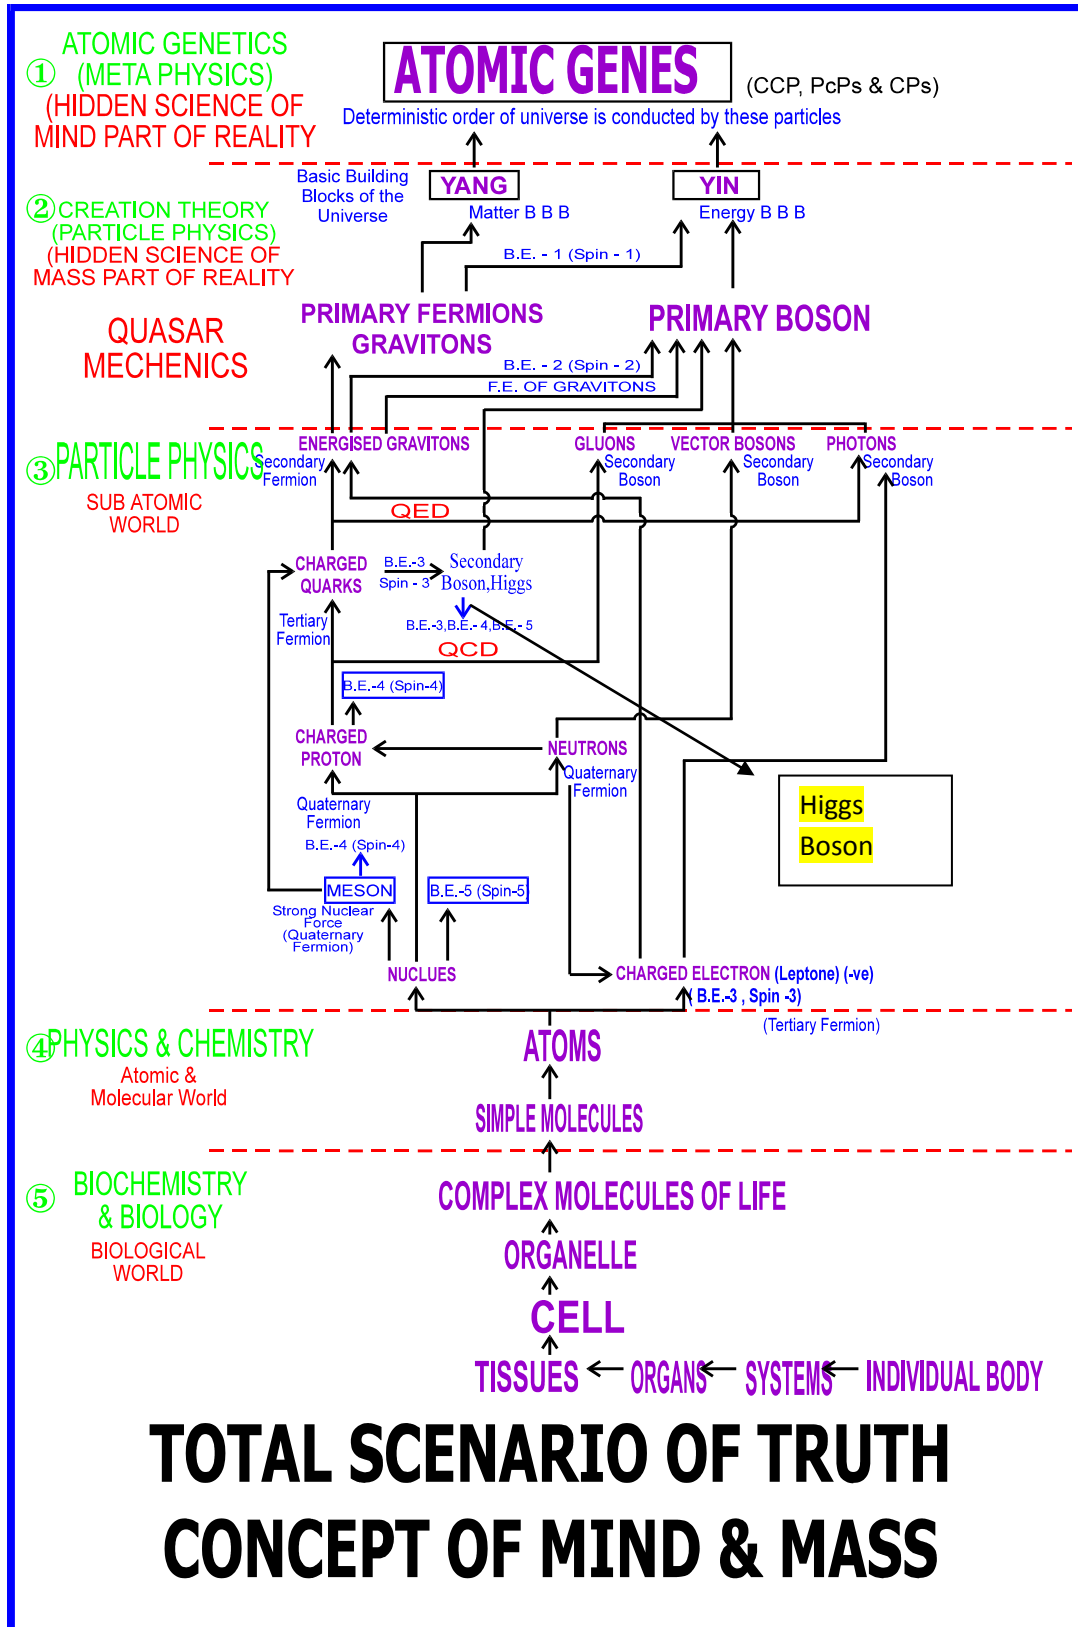

Fig 9.2 Total scenario of Truth Mind and Mass

1.9 DM and DE i.e. energized gravitons and energy pool of the universe as shown in Fig 10 and Fig 11 [8]

Fig. 10 Structural configuration of Leptons and Quarks as regard DM and structural configuration of DM and DE at micro level

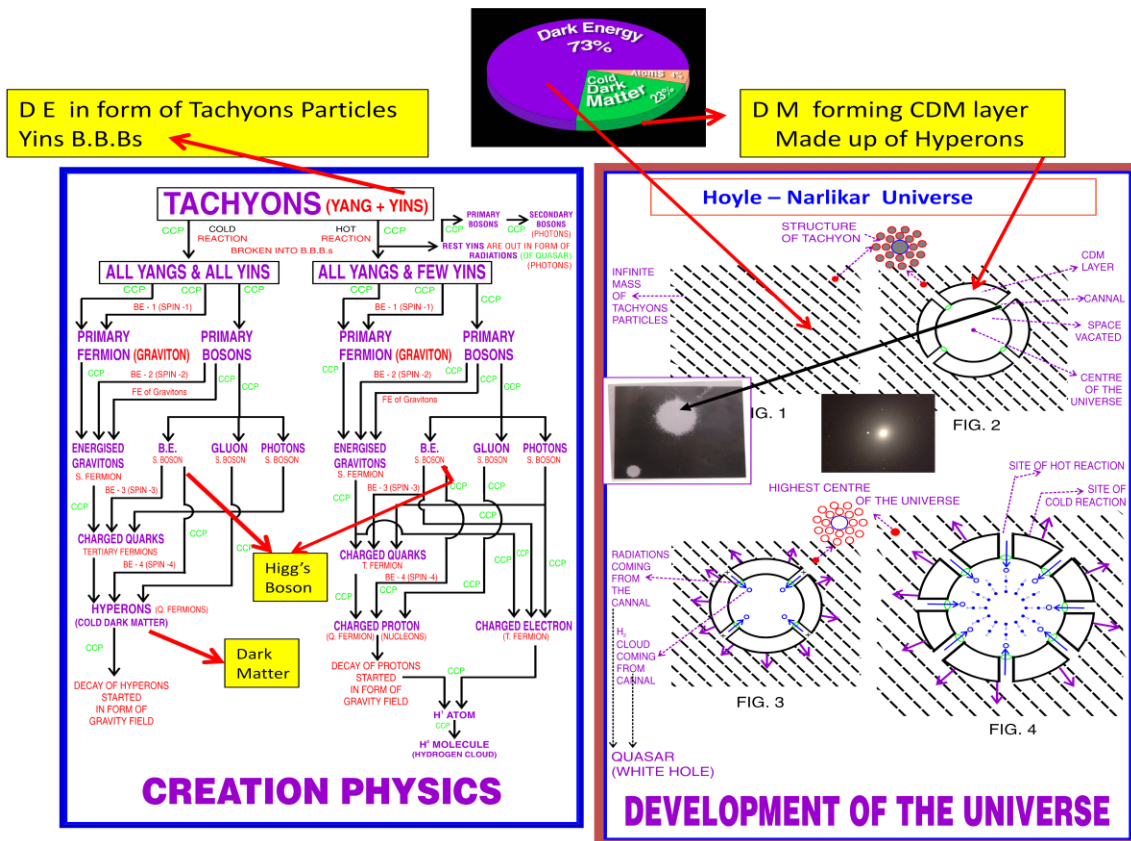

Fig 11 structural configuration of DM and DE at macro level [9]

(Structural and Functional smallest Bit (mass) is B-Bit of the universe and the Divine Mechanical Unit is CCP , Code PcPs and CP.)

DIVINE MECHANICS The Theory of Computers and Brain is SAME as shown in Fig 13

Physics dictates the lowest limits of the size of chips [11]. But divine mechanics does not . Hence the bit is a typical unit of information. ((Classical and Quantum Bit) is wrong and to describe informations by adding qubit is also illusion as in complicate system ,it is the different thoughts expressions that describe informations . Informations are separate (Code PcPs) and bits (Electron of transistor) qubits (electron of diamond crystal) are separate. At DNA level the bit is nucleotide (A,T,C,G) and at Atomic level the bit is photon and electron , at particle level (secondary fermions and secondary bosons) the bit is primary fermions and primary bosons and informations are still code PcPs and at B.B.B level the bit is B.B.B (Yang mass and Yin mass - B- bit) it self and the information is carried by Code PcPs but at all level of all bit units the information storage system is CCP (Physiological arrow of Time) it never dies even after destruction of the universe. Hence informations are eternal . In computers, Bit is a structural configuration that describes informations of the system and informations are in form of Code PcPs. The working of the bit is triggered and controlled by thoughts of higher centers that form that bit. If the bit is classical (transistors of chips) the effect is different . But if the bit is qubit with entanglement the working is triggered and controlled by thoughts of higher center that form that crystal . In both the effect of describing informations would be different.

One is classical (thought expressions are fixed and limited)and other one is quantum (thought expressions are changing and more wide to describe the more wide complicated system to have fast results .) . In life sciences in Brain the bit is again Photon and the informations are Code PcPs and they are triggered and controlled by CCP of higher centers that is triggered by DIVINE MECHANICS .

In life sciences the CCP (cryptography) of B-bit expresses informations (Code PcPs) which were not fed like speaking Lie and unlike Bit of classical computer and qubit of QC it shows phenomenon of forgetfulness and IQ phenomenon (mental age /real age) . It is Higher functions of B.B.B or B Bit and it is life . Hence there is difference in some aspect of DIVINE MECHANICS \of Computers computation and Brain computation

1.11 Earthquakes

Q. Are earthquakes due to defect in formation of earth ?

Figure 14: Distribution of earthquakes with a magnitude less than 5.0 relative to the various **tectonic plates** found on the Earth's surface. Each tectonic plate has been given a unique color. This illustration indicates that the majority of small earthquakes occur along plate boundaries.

An earthquake is a sudden **vibration** or trembling in the Earth. **More** than 150,000 tremors strong enough to be felt by humans occur each year worldwide. Earthquake motion is caused by the quick release of stored potential energy into the kinetic energy of motion. Most earthquakes are produced along faults, tectonic plate boundary zones, or along the mid-oceanic ridges

Earthquake Waves

Earthquakes are a form of **wave energy** that is transferred through bedrock. Motion is transmitted from the point of sudden energy release, the earthquake focus, as spherical seismic waves that travel in all directions **outward** (**Figure 45.1**). The point on the Earth's surface directly above the focus is termed the epicenter.

Figure 14.1: Movement of body waves away from the focus of the earthquake. The epicenter is the location on the surface directly above the earthquake's focus.

Two different types of **seismic** waves have been described by geologists: body waves and surface waves. **Body waves** are seismic waves that travel through the lithosphere. Two kinds of body waves exist: P-waves and S-waves. Both of these waves produce a sharp jolt or shaking. P-waves or **primary waves** are formed by the alternate expansion and contraction of bedrock and cause the volume of the material they travel through to change (**Figure 14 .1**). They travel at a speed of about 5 to 7 kilometers per second through the lithosphere and about 8 kilometers per second in the asthenosphere. The speed of sound is about 0.30 kilometers per second. P-waves also have the ability to travel through solid, liquid, and gaseous materials. When some P-waves move from the ground to the lower atmosphere, the sound wave that is produced can sometimes be heard by humans and animals

1.12 Prediction of Earthquakes [12]

For details please read –[12]

RULES OF TRIGGERING MESSAGES OF DATE TIME AND PLACE OF EARTHQUAKES It is true that all dates, time and places of earthquakes were fed to B.B.Bs working as higher centers by the highest center of the universe during precreation era. They only express the thought when that time comes. This time could be predicted (not very precisely as we are observer in the event , quantum concept or law of uncertainty). Had we been participator (seismic focus, sun , highest center) , we would have predicted the event very very precisely. (participatory concept or law of certainty).

- 1.----- It is the science of astrology (seeing the apparent path of the planets or ZODIAC) that would help us in predicting the dates of the earthquakes.
- 2.----- Zodiac-- It is defined as the apparent path of the sun which we observe in twenty four hours . It is 360 degree.
- 3.----- This 360 degree has been divided into 12 sectors of 30 degree each named as SIGN.
4. ----- These 12 sectors (signs) have been represented as 12 sectors of horoscope. (Fig. 14.2)

Fig 14-2 - These 12 sectors (signs) have been represented as 12 sectors of horoscope.

5. ----- These 12 sectors or signs are named according to the constellations coming in that sector. They are----- ARIES, TAURUS, GEMINI, CANCER, LEO, VIRGO, LIBRA, SCORPIO, SAGITTARIUS, CAPRICORN, AQUARIUS AND PISCES.
6. ----- Sun , Mercury, Venus , Mars, Jupiter, Saturn, and Moon occupy these sectors during their revolution.
- 7.----- These celestial bodies used to cross these sectors (SIGNS) regularly and their crossing time varies.

1. SUN-----	approx.-----	monthly
2. VENUS-----	-----	monthly
3. MERCURY-----	-----	monthly
4. MOON-----	-----	2.5 days
5. SATURN-----	-----	2.5 years
6. JUPITER-----	-----	1.5 years
7. MARS-----	-----	3 months

8.POSITION OF MOON WITH SUN - When moon is with the sun or 5 sectors ahead , or 7 sectors ahead or 11 sectors ahead, date of earthquake can be predicted or the messages of the earthquakes are triggered during these positions.

9. The triggering of delayed messages of earthquakes could be there and it is associated with all except moon. The delay could be of 3 days, (especially with sun) , or 4th day (+_ 1 day) with other remaining 5 celestial bodies.

Thus at the verge of crossing the sign (from 30 degree to 31 degree) the date of the earthquake can be predicted or the message of earthquake is triggered during this change.

Rule [12]

Whenever sun crosses any sign of zodiac, then on the same day, the date of the earthquake can be predicted, if earthquake does not occur on the same day, then add two-days more. It means the earthquake will occur on the third day including the date of crossing the sign of zodiac by the sun.

Example

On January 14, 1995 the sun had crossed the 9th sign which was Sagittarius and it came to the 10th sign which was Capricorn. On this basis, we have decided that the earthquake will occur on January 14, 1995, the same day. If it will not occur on January 14, 1995, then we will add two days more. It means $14 + 2 = 16$ or third day including the date of crossing the sign. It also means January 16, 1995. So, we were sure that the earthquake will occur

either on January 14, 1995 or on January 16, 1995. According to the rule, on January 16, 1995 a strong earthquake hit Japan near the south coast of western Honshu. It was located on 34.06° north and 135.00° east. About 5502 persons lost their lives. Magnitude of this earthquake was 6.9. On the basis of this rule, we have predicted so

many dates of significant earthquakes, which later on proved to be true. A few instances are given as follows: As nature is working by its thought and we have calculations to know that thought expressions that trigger the messages of date, time and place of earthquakes, that is occurring on the sun. These calculations are successful in predicting the dates only upto 80% of the known events.(minor as well as major earthquakes) as studied by us. [13]

**Frequency of Occurrence of Earthquakes
Based on Observations since 1900**

Descriptor	Magnitude	Average Annually
Great	8 and higher	1
Major	7 - 7.9	18
Strong	6 - 6.9	120
Moderate	5 - 5.9	800
Light	4 - 4.9	6,200 (estimated)
Minor	3 - 3.9	49,000 (estimated)
Very Minor	< 3.0	Magnitude 2 - 3: about 1,000 per day Magnitude 1 - 2: about 8,000 per day

II. STRUCTURE

2.1 Modified theory of atomic structure as Niels Bohr's theory has limitations in explaining different series of hydrogen spectra.

New assumptions of structure of hydrogen atom. – Divine Modified Niels Bohr 's Theory (**Divine MONB**) as shown in Fig 14.3

1. Hydrogen atom is like a miniature solar system with the negatively charged electron moving in circular orbit around positively charged nucleus having positively charged particle proton. In this circular orbit or stationary orbits , electron is being held by single string of energized gravitons . This energy level is called ground state.
2. When Hydrogen atom is excited, the electron moves from ground state to excited state energy levels making a bigger circular orbit and having reached in this new energy levels , it also emits radiations . Hence absorption and emission of energy quanta occur simultaneously. Shifting is understood in inter orbital shift phenomenon.
3. When excitation is over, the electron once again come back to ground state energy level . All above mentioned events are triggered by different thoughts or atomic transcriptions from the nucleus or proton in case of hydrogen atom.
4. These atomic transcriptions are being triggered by conditioned stimulation of CCP by the message system made up of photons (second transcription or –ve charged photons or afferent path) coming from electron to proton and further they are transmitted by photons (second transcription made up of +ve charged photons, or efferent path) to electron. Having received the messages , electron works accordingly. Unless the thought is expressed, nature cannot work . as shown in Fig 14
5. When electron is in ground state, its interaction with energized graviton and electromagnetic photon is more hence IP -13.59ev (n=1) is required to remove electron from this energy level. During excited stage the interaction is different hence I.P. to remove electron from this state is -3.4ev (n=2), -1.511ev (n=3), -0.850ev (n=4) , -0.544ev (n=5) respectively. It the changing thought of interaction with energized graviton and electromagnetic photons that gives changing effect .
6. Electronic configuration of higher atoms could be known by studying I.P. curve . Working of hydrogen atom as shown in Fig 14.3 .

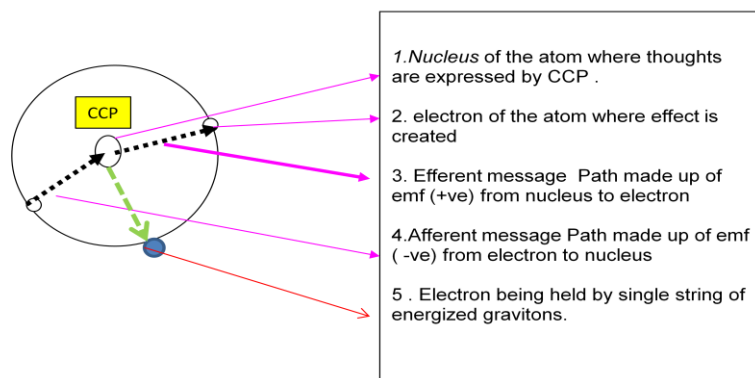

Fig 14.3 working of hydrogen atom – Divine MONB Theory

2.2 Origin of Earth and Solar System

ORIGIN OF THE EARTH AND SOLARSYSTEM

Figure -15 origin of solar system

Till today it is believed that earth is the part of sun and sun is second generation star..There are observations which contradict this hypothesis. After the formation of rotating GMC (giant molecular cloud), there developed many nidus (B.B.Bs working as higher centers) in the rotating nebula. These higher centers expressed thoughts of condensation of nebula in different sectors that will give rise to formation of proto stars, protoplanets, proto satellites and proto asteroids and thoughts of contraction or collapse that will cause shrinkage of proto star, protoplanets and proto satellite. The formation of asteroid belt is due to thought expression of clumping or collapse . Thus there developed many different sectors in same nebula. Along with this the spin thoughts were also triggered . This led to development of spin of proto star, protoplanets, proto satellites and proto asteroids. Finally the nebula transformed into proto star, protoplanets, proto satellites and proto asteroids. About 4.6 billion years ago, formation of our solar system took place.(Figure 15) In these proto star, protoplanets, proto satellites, proto asteroids many other different thought expressions were expressed by many other higher centers (B.B.Bs) that had led to formation of sun, different planets, different satellites and asteroid belt between mars and Jupiter. ALL ARE BORN FROM SEPARATE NEBULAR SECTORS AND THUS THEY ARE

CREATED WHERE THEY ARE PRESENT NOW IN ORBIT. They all have their different shapes, size, different properties, different compositions and behavior which were triggered by many different higher centers..The asteroid belt present between Mars and Jupiter was created from proto asteroid by phenomenon of clumping. THIS WAS ALL DUE TO UNCONDITIONED THOUGHT EXPRESSIONS OF B.B.Bs.(Figure 7)

2.3 Origin Of Continents And Shifting Of Continents

When the Earth was forming , there developed many other higher centers for different thought expressions. These were--

1. Thought expressions of formation of continents and water.
2. Thought expressions of formation of different layers of the earth.
3. Thought expressions of formation of different layers of atmosphere.

And thus Pangea continent, sea, different layers of earth, and different layers of atmosphere were formed by target B.B.Bs.

Simultaneously there developed other higher centers which expressed following thoughts--

1. Thought expression of ignition of the core
2. Thought expression of magma.
3. Thought expressions of shifting of continents.(Figure 16)
4. Thought expressions of seismic foci
5. Thought expression of water cycle

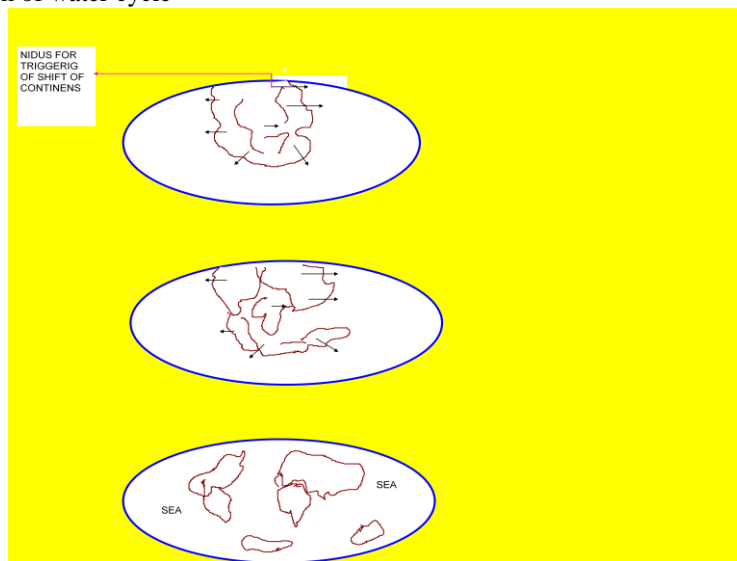

Figure 16 shifting of continents

And thus formation of heat in the core, magma in mantle layer, seismic foci in lithosphere (Figure 17), shifting of different continents in their respective directions and appearance of water cycle took place by different target B.B.Bs. This was all triggered by unconditioned working of B.B.Bs. The entire transmutation took place simultaneously

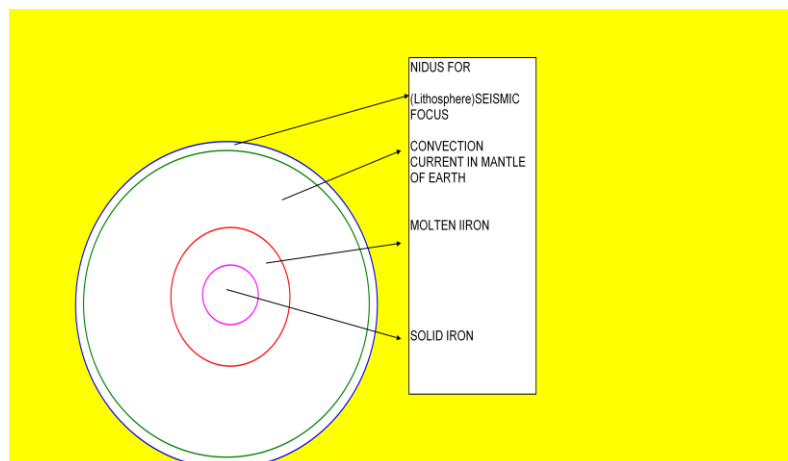

Figure 17 Nidus for sesmic foci

2.4 Triggering and regulation of Seismic Focus

TRIGGERING AND REGULATIONS OF SEISMIC FOCUS.-----There are many seismic foci present in the lithosphere. Seismic foci is defined as vibrating atoms (atoms plus kinetic energy particles interacting to produce to and fro motion) (Figure 18) . If the seismic focus is of low grade, it means thoughts are of low amplitude, low magnitude, less number of atoms will interact less amount of kinetic energy particles to trigger that strength of seismic focus. If the seismic focus is of large grade, it means thoughts are of large amplitude, large magnitude and more number of atoms will interact with large number of kinetic energy (K.E.) particles to trigger that strength of atomic vibrations or to produce fixed scale of earthquake. The seismic focus is triggered by thought expressions by higher center (B.B.B) present in that seismic focus. . It is followed by formation of programmed messages (Code PCPs (B.B.B) amplitude, magnitude, number of atoms and kinetic energy particles involved in that phenomenon) . These messages move from higher center to lower centers and from lower centers to target B.B.Bs. Finally we observe the effects of either low grade atomic vibrations or seismic focus or of high grade atomic vibrations called earthquakes. (Figure 19)

TRIGGERING AND REGULATION OF EARTHQUAKES

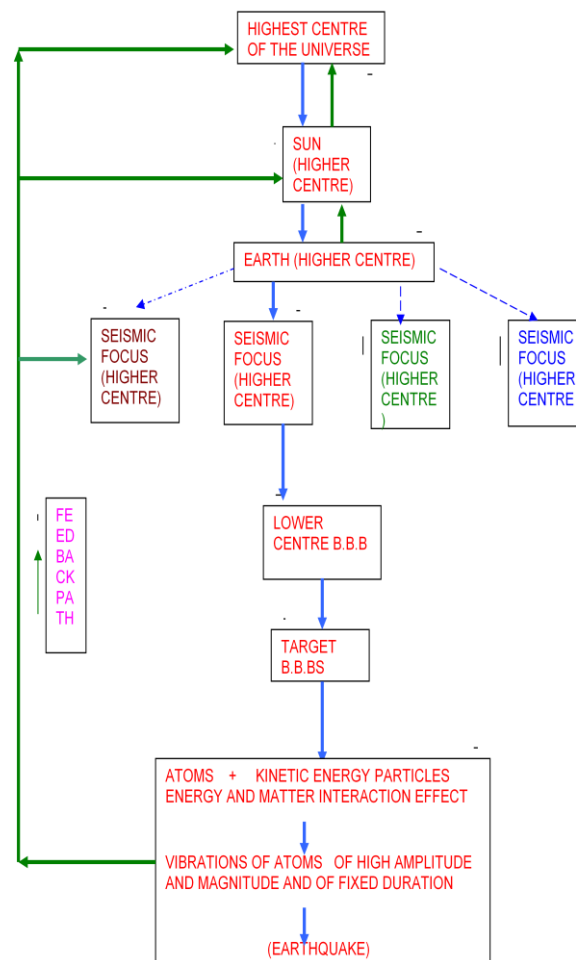

Figure 18 Triggering and regulation of Earthquake

TRIGGERING AND REGULATION OF SEISMIC FOCUS AND EARTHQUAKE

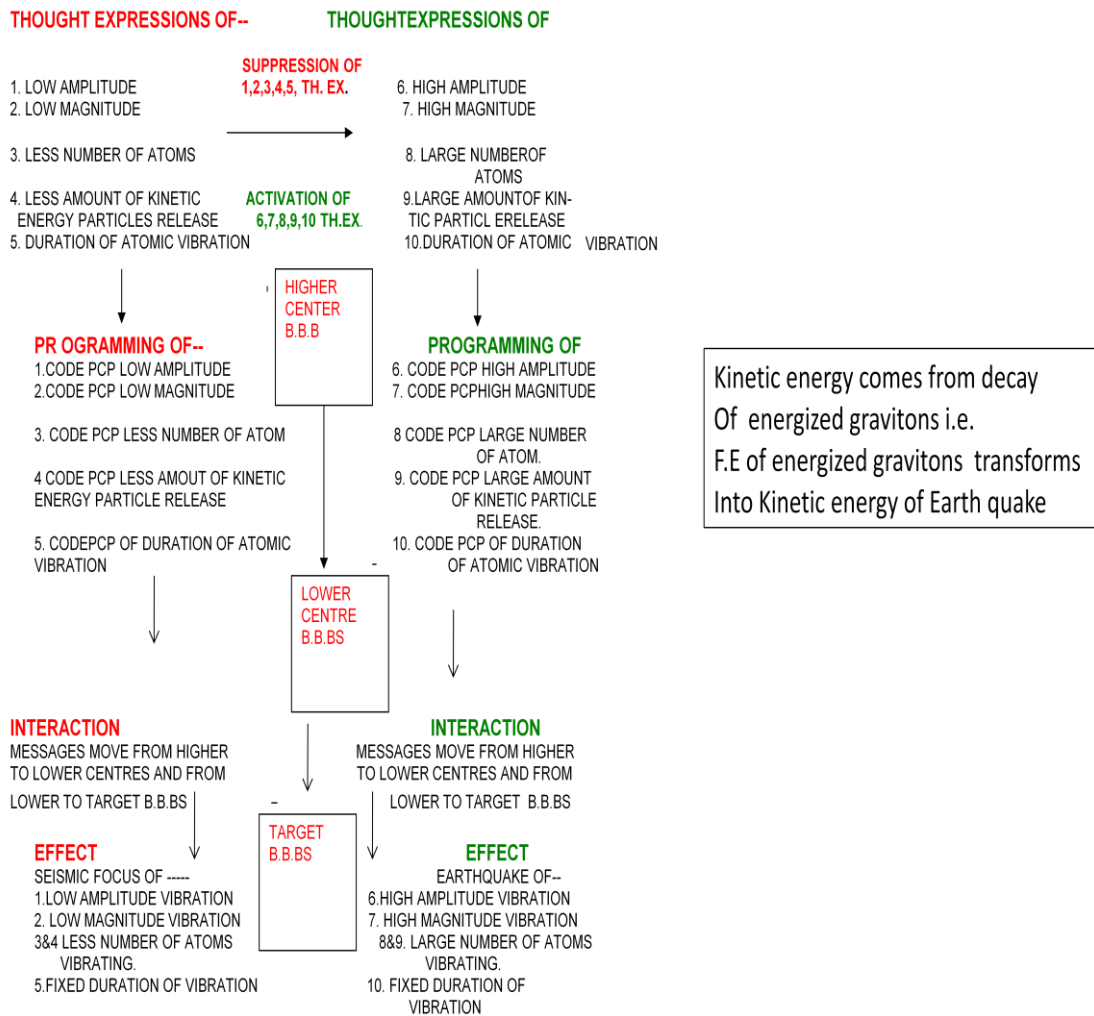

Figure 19 triggering of Earth quake

TRIGGERING AND REGULATION OF DATE MESSAGES (Code PCPs date) , TIME AND PLACE MESSAGES (code PCPs time , code PCPs place) FORMATION OF EARTHQUAKE ON SUN.----- The sun is a unit and head of solar system. It is equipped with higher centers. These higher centers can send messages to all planets through EFFERENT paths (made up of first transcription). Sun could received messages from these planets (higher centers) through AFFERENT paths or FEEDBACK paths (Figure 20)

Messages of date, time ,place are triggered in sun and they reach to earth (higher center) and from here to higher center of seismic focus. First transcription is the message system that works in this phenomenon i.e. the pure atomic genes carry the messages of date, time and place from sun to earth and from earth to higher center of seismic focus. These messages are triggered on sun either by outer stimuli (conditioned stimulation of thought expression) i.e. messages coming from other planets or satellite or they are self stimulated (unconditioned stimulation of thought expressions). The higher centers of the sun are under control of highest center of the universe. (Figure 18)

TRIGGERING AND REGULATION OF DATE, PLACE AND TIME MESSAGES FORMATION OF EARTHQUAKE IN SUN

Figure 20 Sun the Head of Family triggers Earthquakes on earth

2.5 WHY DO PARTICLES , NUCLEUS OF ATOMS , PLANETS, SETALLITES , SUNS AND GALAXIES SPIN ?

Particles do spin because –

1. It is the property of fermions and bosons and nucleus of atoms.
2. By B.E. – 1,2,3,and 4 , primary , secondary , tertiary and quaternary fermions get spin. And primary and secondary bosons get spin.
3. By B.E.-5 , nucleus of atoms get spin.
4. Spin makes matter B.B.B into spin motion (primary fermion i.e. graviton) .
5. Spin makes secondary fermion , tertiary fermion and quaternary fermions into spin motion.
6. Spin make primary bosons into spin motion .
7. Spin makes secondary bosons into spin motion.
8. Spin makes nucleus of Atom in to spin motion.
9. These spin motions help to quantize the particles from one another.
10. Spin helps in shifting the messages (interaction part) from one part of atoms to another part of atom.
11. Gravity interaction is totally based on spin of objects and spin of energized gravitons . Starting from bending of starlight to planetary motions of planets etc. Had there been no spin , no gravity effect could be visible . (pl read gravity chapter.)
12. Gravity is not exchange phenomenon . It does not show shielding effect and it is due to interaction between energized gravitons and spin of nucleus of atoms.
13. We measure gravitational mass in amu (atomic mass unit) of particles and nucleus and it could only possible due to spin property of nucleons and nucleus . Pl. see mass defect and energy release from fusion and fission.

14. All effects like Raman effect , Zeeman effect , VIBGYOR formation is due to spin property of electron that moves around nucleus in atom.
15. All scientific interactions in physics, chemistry and biology are due to electron spin motion.

Planets , satellites , asteroids and galaxies do spin because – their divine mechanics would be discussed separately .

- a. For our planet – During formation of earth from rotating nebula, earth got separated only when spin got triggered. . Hence spin makes formation of celestial bodies from hydrogen and helium cloud.
- b. For our moon – Hence spin makes formation of celestial bodies from hydrogen and helium cloud
- c. For our sun – Hence spin makes formation of celestial bodies from hydrogen and helium cloud
- d. For asteroids- Hence spin makes formation of celestial bodies from hydrogen and helium cloud
- e. For galaxies - GMC transformed into bright galaxy only when spin of proto star triggers . Spin of galaxies makes these suns into orbital motion around the center of mass of galaxies by gravity interactions. The stars nearer moves faster than those which are away from center.

Planets do spin by virtue of thought of spin is triggered . Direction and magnitude of spin is also decided by different thoughts . **It is constant in Time unless thought gets changed** . The energy is supplied by energized gravitons (energy pool of universe) . Same philosophy is followed by spin of satellites , asteroids and galaxies

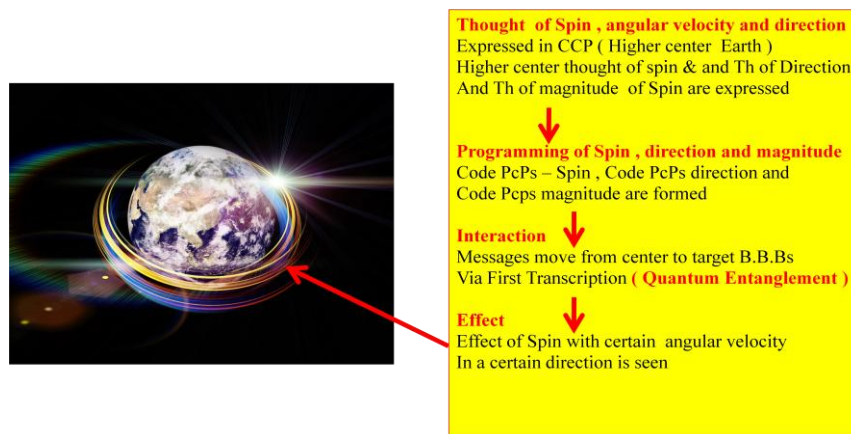

Fig 20.1 Planets do spin by virtue of thought of spin is triggered

2.6 Origin and triggering of Spin property of fermions and bosons .

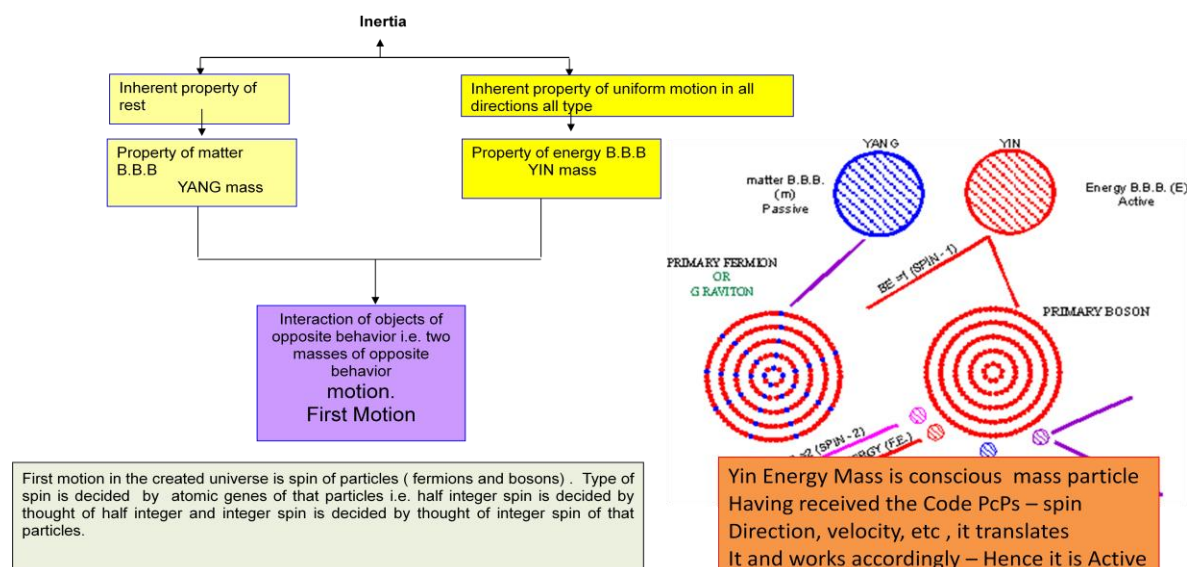

Fig 21 spin property of fermions and Bosons

Triggering of type of spin of fermions and bosons – (Fig 21, 22, 23)

All fermions exhibit half integer spin means $\frac{1}{2}$ of basic rotation rate or their multiply and all bosons have integer spin means one of basic rotation rate or its multiply . For the proton the number is $\frac{1}{2}$. In the other words

, we find experimentally that the proton spins at precisely half of the basic rotation rate that the quantum mechanics assigns to it . In the jargon of high energy physics , we say that the proton has spin $\frac{1}{2}$ or it is a spin $\frac{1}{2}$ particle. Particles that rotate exactly at the basic rotation rate are said to have spin-1. **Particle that do not rotate (Basic Building blocks) at all have spin -0, and so on .ANY particle we talk about will have some rotation rate , and this rotation rate is constant in time.**

Phenomenon of Computation of Half integer spin
 The result is activated code PcPs half integer by unconditioned Thought expression (triggered by TM)

Fig 22 Divine Mechanics

In atomic transcription and translation of half integer spin , following steps take place on Yang B.B.B – B-Bit of fermions (Figure – 22) .

- 1.TM (time mindness -black) triggers atomic transcription of half integer spin of fermions
- 2.CP removes RM (repressor mindness-green) from OM (operating mindness -orange) thus induction of atomic transcription of half integer spin of fermions is triggered .
- 2.OM triggers activation of free mind particles (blue -inactivated code PCPs) of that thought script (magenta) of “ **Code PcPs half integer spin of fermions** ” .
- 3.Free mind particles (blue -inactivated **Code PcPs of half integer spin of fermions**) get attached to anti mind particles script (magenta one) to form messenger thought script of “**Code PcPs half integer spin of fermions** ” .
- 4.Messenger atomic genes (blue) get activated by anti mind particles thought script and further they get detached from anti mind particles thought script to form activated messenger atomic genes (activated code PCPs) (sky blue – open eye) of “**Code PcPs half integer spin of fermions** ”
- 5.CP carries phenomenon of splicing by translating the messenger activated atomic genes (activated code PcPs) and finally there is activated message of “**Code PcPs half integer spin of fermions** ” is formed .
- 6.CP represses atomic transcription by adding RM (green) to OM (orange) . Thus atomic transcription gets **halt of half integer spin of fermions**

Once the information’s (Code PcPs- spin , velocity , directions , magnitude etc) is formed , the mass of Yin translates it and it works accordingly . That is how mind and body (mass) work together at the level of B.B.Bs. . Same steps do occur in the formation of one integer spin of bosons on Yin B.B.B of boson unit higher center .

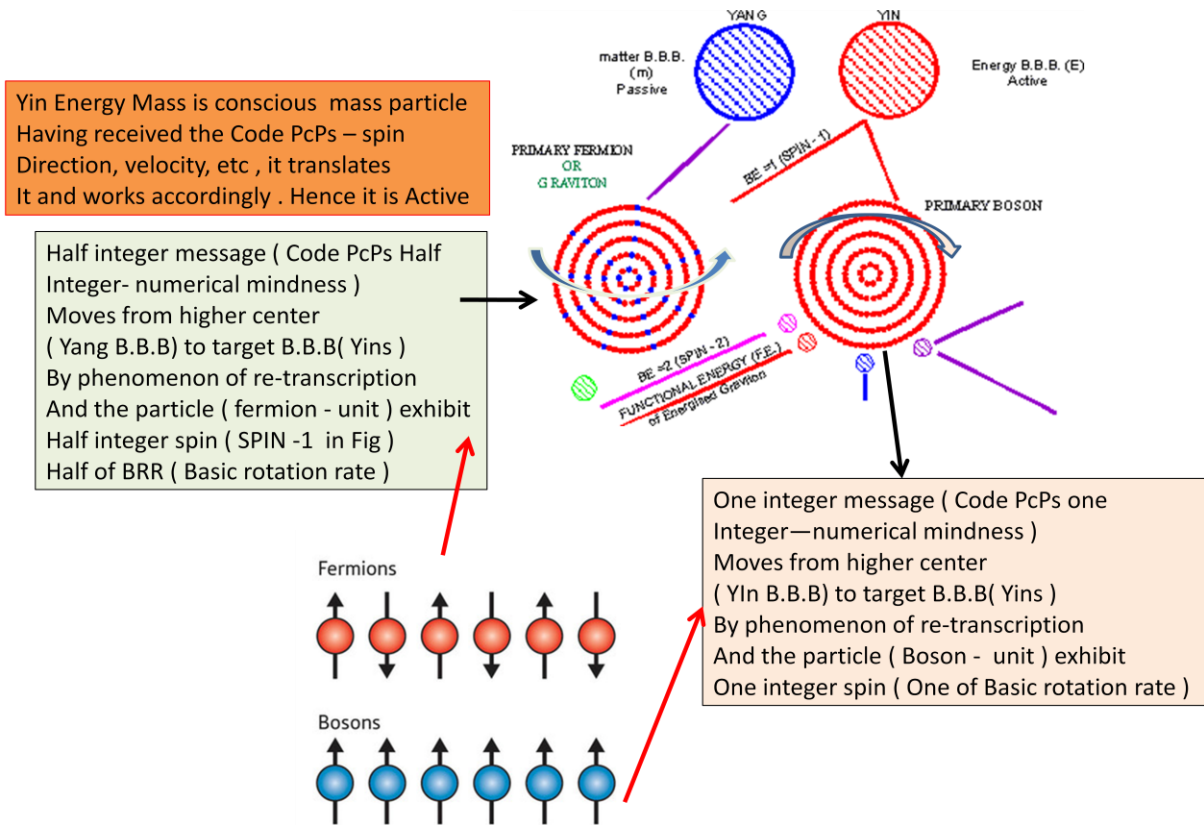

Fig 23 Triggering of half integer and one integer spin of fermions and bosons by mind

III. CONCLUSIONS

It is myth that tectonic plates collisions trigger earth quacks. To understand spin of Earth and Earthquakes we have to understand Basic Building Blocks of Universe (Fig -1) . Thought of spin of Earth is triggered by Earth (Higher center) while thought of triggering of Earthquakes is triggered by celestial bodies of Solar system mainly Sun (Higher center) . Thought of triggering of spin of Earth has no relationship with thought of trigger of Earthquakes . Both thoughts are separate and their simultaneous expressions are independent of each other (Mendel’s Law of independent assortment) . These are fed thoughts and feeding was done in precreation era by Highest Center of Universe . Hence earthquakes could be predicted (By Science of Astrology – movement of celestial bodies mainly sun) and prevented (only by atomic genetics engineering - Quantum Entanglement) . Planets do spin by virtue of thought of spin is triggered . Direction and magnitude of spin is also decided by different thoughts . **It is constant in Time unless thought gets changed** . The energy is supplied by energized gravitons (energy pool of universe) . Same philosophy is followed by spin of satellites , asteroids and galaxies .

As nature is working by its thought and we have calculations to know that thought expressions that trigger the messages of date, time and place of earthquakes, that is occurring on the sun. These calculations are successful in predicting the dates only upto 80% of the known events as studied by us [13]

It is true that messages of earthquakes come from the Sun via first transcription and (quantum entanglement) all messages are fed messages as far as date, time, place amplitude, magnitude and number are concerned. This feeding was done by highest center of the universe during precreation era. Now if we want to prevent the earthquakes, we can use atomic genetics engineering to prevent it. In ATOMIC GENETIC ENGINEERING, our B.B.B talks with Highest center of the universe to stop these messages that are triggering on sun that causes tremendous loss of life and properties during the earthquakes. (Fig 4.1)
